

SC FSDO FAAS Team presents:

# Reducing Regulatory Roadblocks

The GAJSC has determined that GA is going through a technical revolution that started in the mid 1990's and is accelerating today. Taking advantage of the rapidly expanding technical revolution is an important component of reducing GA accidents. The GAJSC believes the FAA must find ways to help reduce the cost to install safety enhancing technology as the installation may have minimal risk but can offer substantial safety benefit. Will explain how FAA has begun to the reduction and then review the SC FSDO 2nd Safety Report.

**Directions:** Seminar will be in Airport Terminal Conference Room at the Airport

Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines

**A message from the National FAASafety Team Manager**
